### **DETAILED ACTION**

This Office Action is responsive to the Amendment filed on January 22, 2007. The Applicant has cancelled withdrawn claims 60-100 and 102-113; amended independent claim 52; and added new claims 114-127.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 52 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 52, the phrase "being constructed of a material such that" renders the claim indefinite. "Wherein" may raise a question as to the limiting effect of the language in a claim. The determination of whether each of these clauses is a limitation in a claim depends on the specific facts of the case. *In Hoffer v. Microsoft Corp.*, 405 F.3d 1326, 1329, 74 USPQ2d 1481, 1483 (Fed. Cir. 2005).

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1745

4. Claims 52, 114, 115, 121, 122 are rejected under 35 U.S.C. 102(b) as anticipated by Clough, U.S. Pat. No. 5,601,945.

Clough teaches an anode being constructed of a material such that the anode is a chemically rechargeable anode (col. 31, lines 1-4; col. 16, lines 35-50), wherein at least a portion of the anode is liquid (col. 6, lines 40-53; col. 8, lines 7-22) at a temperature at which the anode is operated. The anode of claim 52, wherein the anode comprises tin (col. 1, lines 37-62; col. 4, lines 24-40). The anode of claim 52, wherein the anode is chemically rechargeable to a reduced state from an oxidized state comprising an oxide selected from the group consisting of a metal oxide and a mixed metal oxide (col. 4, lines 24-37).

Thus, the claims are anticipated.

***Claim Rejections - 35 USC § 102/103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 116-120, 123-127 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Clough, U.S. Pat. No. 5,601,945.

Clough teaches an anode as described above.

Thus, the claims are anticipated.

Art Unit: 1745

However, if the claims are not anticipated, they are obvious because although the prior art of record does not recite the temperatures at which the anode is operable, if a prior art structure is capable of performing the intended use as recited in the preamble, then it meets the claim. See, e.g., *In re Schreiber*, 128 F.3d 1473, 1477, 44 USPQ2d 1429, 1431 (Fed. Cir. 1997).

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chiang et al., U.S. Pat. No. 6,599,662 B1, teach a tin oxide anode. Olsen et al., U.S. Pat. No. 5,455,127, teach a tin oxide anode.

### ***Response to Arguments***

8. Applicant's arguments with respect to above claims have been considered but are moot in view of the new ground(s) of rejection.
